Welcome to 'A Global Journey: Connecting Experts Worldwide,' our international course program that delivers a unique approach to dental education. By collaborating with renowned dental professionals from all corners of the globe and uniting our expertise, we aim to provide you with an immersive experience that goes beyond the ordinary.

This program is not limited to acquiring knowledge, it is an invitation to connect, engage and shape the future of dentistry. With your participation, you will gain access to a wealth of know-ledge, top-notch dental expertise, and insights from the best in the field but also sharing your own experience and skills with an international audience. We invite you to become a vital part of this vibrant international community of dental excellence, going beyond geographical limitations.

Sincerely
Your management

CONTENT POINTS

- ◆ Primary stability.
- ◆ Bone management.
- ◆ Soft tissue management.
- ◆ The three golden rules for successful surgery.
- ◆ Increase confidence with immediate loading.

COURSE DURATION

1 day
full-day

TARGET GROUP

- ◆ Dentists
- ◆ Dental technicians
- ◆ (Oral) surgeons & implantologists

COURSE LEVEL

BEGINNER

SPEAKER

After graduating from Birmingham University in 1985, Dr. Hardmann worked in associate and locum positions, as well as running her own practice. Her real interest lies within the field of dental implants for which she attended courses throughout the world, culminating in a master's degree in Implantology at Lille University Medical School in France.

As founder and former president of the Oxford Society of Oral Implantology, Dr. Hardman was involved in mentoring postgraduate dentists in implantology. In 2006, she envisioned a "perfect practice" with purpose-built clinical and training facilities resulting in the creation of the blueprint for Clinic 95 which opened in 2010. Dr. Maria Hardman's 35 years of experience as a clinician is invaluable and underpins her expertise in dental implants.

SPEAKER

Since graduating from the prestigious University of Birmingham Dental School in 2007, Dr. Chohan has treated patients in dental practices, building strong relationships with both patients and staff due to his relaxed and educational demeanor. He has been managing patients with dental implants since 2011 and can replace anything from a single missing tooth to complete sets of teeth.

He frequently takes on challenging cosmetic cases encompassing veneers, crowns, dental implants, teeth straightening, and teeth whitening for an entirely new smile. He also shares his expertise by teaching other dentists and their assistants how to perform dental implant procedures through lectures and tutorials.

SPEAKER

Dr. Maleca education began in 1990 when he graduated from the Faculty of Odontology in Lyon. Two years after he graduated from the University of Lyon he joined the Periodontology department of the faculty of odontology. In 1994 he proceeded to obtain his post-graduate diploma in the field of fundamental and clinical periodontology and occlusodontics.

Dr. Maleca is a dental surgeon who practices exclusively within the field of Periodontoly Implantology as well as specializes in laser treatment. He is recognized in that area, thus teaches laser techniques and regularly gives lectures, notably on his laser technique for clot stabilization in dental extraction sites (laser alveolar preservation). Dr. Thierry Maleca's surgical approach is based on therapeutic simplification, with simple, effective treatment plans that reduce the operative after-effects and restore his patients' smiles and confidence.

Dr. Thierry Maleca
Dentist

IMPLANT OF THE 21ST CENTURY – THE ZIRCONIA IMPLANT + LIVE SURGERY

CONTENT POINTS

Content points – Day 1:

- ◆ Flapless whiteSKY implant live surgery + Discussion.
- ◆ Prosthetic protocols on whiteSKY implants.
- ◆ Digital impression taking on zirconia implants with intra-oral scanner.

Content points – Day 2:

- ◆ Implantation of whiteSKY Tissue Line and Alveo Line implants immediately after extraction.
- ◆ Placement of temporary prosthesis.
- ◆ Debriefing.
- ◆ Hands-on/Practical work on implantology simulators: Placement of zirconia implants.

Dr. Manolakis comes from a family of dentists, which inspired him to become one himself. He has vast knowledge in dentistry with the unique combination of themes from technical work, aesthetics, peri-implant biology, and Periodontology. However, he did not specifically specialize in one of the subjects although the matter/concept of treatment planning fascinates him.

In the end Dr. Manolakis prefers to work as a general dentist to experience the full range of dentistry. He is a pioneer in guided surgery, digital implantology and prosthetic driven implantology. Besides his work as a dentist, Dr. Manolakis also enjoys lecturing thus he has been active as a speaker in 22 countries.

SPEAKER

After obtaining his Bachelor's degree in Mumbai, Dr. Tunkiwal proceeded to pursue his Master's degree majoring in Prosthetic Dentistry from the Government Dental College and Hospital also in Mumbai. Since gaining his degree in 1998, he has focused on placing and restoring implant cases efficiently using conventional and digital techniques.

Dr. Tunkiwal is a director of Impart Education, a continuing education academy in Mumbai in India, which nurtures motivated clinicians towards predictable, evidence-based dental practice through extensive training and lectures. In Mumbai, where he has maintained a dental clinic for more than 25 years, he dedicates most of his time performing full-mouth rehabilitation, implant, and aesthetic dentistry procedures. He is internationally well regarded as an expert in Socket Shield Techniques.

Dr. Ali Tunkiwal

CONTENT POINTS

- ◆ Protocols to achieve predictable aesthetics with implant restorations in the anterior zone.
- ◆ Digitally guided Implant placement.
- ◆ Hard & soft tissue preservation.
- ◆ Ideal Implant size & position for a good emergence profile.
- ◆ Custom abutment designs for soft tissue support – EBC, RRA.
- ◆ Immediate prefabricated Restoration.
- ◆ Case presentations.

Hands on – on models:

- ◆ Guided implant placement in an immediate extraction socket
- ◆ Adapting a prefabricated tooth shell over a Titanium base to develop an Esthetic biologic contour.

COURSE DURATION

1 day
full-day

Additional day required if Live patient demo

GUIDED FULL ARCH IMPLANT RESTORATIONS – fast & fixed THERAPY

MUMBAI, INDIA

CONTENT POINTS

- ♦ Why go digital?
- ♦ Options in Full arch implant restorations – FP1, FP3.
- ♦ CBCT & IOS data requirements for different full arch situations.
- ♦ Implant planning & Guide designing for different guides – tooth or tissue supported.
- ♦ Stackable & Non stackable Guides.
- ♦ Tilted implants and abutment choices.
- ♦ Full arch provisional & final material choices.

Hands on – on models:

- ♦ Guide fixation and drilling protocol with implant placement.
- ♦ Abutment transfer.
- ♦ Pick up of titanium copings into the provisional full arch prosthesis.

COURSE DURATION

1 day
full-day

Additional day required if Live patient demo

ITALY

HANDS-ON TRAINING FOR HARD AND SOFT TISSUE MANAGEMENT AROUND THE IMPLANT

ROME, ITALY

CONTENT POINTS

The program is for 2 days articulated in three parts represented by:

- 1) 1.5-day **Frontal lesson**: Theory, surgical videos and interactive approach on clinical cases.
- 2) **Live surgery**: Demonstrating the application of bone regeneration technique and soft tissue management.
- 3) **Hands-On**: Practicing the techniques shown during the course on a pig jaw.

Content points – Modul 1:

- ◆ Everything about the bone (e.g. bone Physiology, bone regeneration surgical oriented anatomy, bone atrophies classification, planning the bone regeneration with clinical and radiological diagnosis, bone harvesting techniques, bone substitute materials).
- ◆ Flap Design.
- ◆ The periosteal release.
- ◆ Barriers.
- ◆ Suture techniques and Post-OP Management.
- ◆ Mucogingival surgery around implants before, during and after the procedure with Free Gingiva Graft (FGG) and Bilaminar techniques.

SPEAKER

Dr. Ghirlanda graduated with honors in Dentistry in 1988 from the University of Rome, Italy “La Sapienza”. After his residency at the Department of Periodontology, he became an adjunct professor of Histology at the same university from 1996 to 1999 and a visiting Doctor at Harvard Dental School. He has a master’s degree in Implantology from the University of Murcia in Spain.

Currently, Dr. Ghirlanda is active as a visiting Professor at the UCAM of Murcia. He has extensive knowledge in Oral Surgery, Implantology and Periodontology thus participates as a speaker at numerous congresses both in Italy and worldwide. Increasingly, his lectures focus on aesthetics, immediate loading, soft and hard tissue management in implantology. He is an active Member of IAQ, SIRIO- ARCOI and EAO. Dr. Giovanni Ghirlanda has been a Key Opinion Leader for bredent medical since 2006.

Dr. Giovanni Ghirlanda
Dentist

Content points – Modul 2:

- ◆ Etiology and diagnosis of mucogingival problems.
- ◆ Treatment planning.
- ◆ Predetermination criteria of therapeutic result.
- ◆ The periodontal plastic surgery as part of the prosthetic treatment plan.
- ◆ Plastic surgery for the correction of exposed roots with single and multiple elements.
- ◆ The rationale for using the grafts.
- ◆ Mucogingival surgery around implants before, during and after the procedure with Free Gingiva Graft (FGG), usage of soft tissue matrix around implants and Bilaminar techniques.

PORTUGAL

CONTENT POINTS

Day 1:

- ◆ Introduction.
- ◆ Aesthetic zone risk analysis.
- ◆ Socket classifications and treatment indications.
- ◆ Post extraction socket biology and the role of PDL.
- ◆ Immediate implants and immediate provisionalization from conventional surgery and prosthetics principles to guided surgery and guided provisional restoration.
- ◆ Sockets type 1 Management with dual zone and socket shield techniques.
- ◆ Sockets type 2 Management with the immediate alveolar reconstruction (IDR) technique.

Day 2:

- ◆ Soft tissue management in the aesthetic zone from indications to harvest, flaps and tunnel.
- ◆ Immediate implants and immediate provisional Hands-On.
- ◆ Implant placement and contour augmentation in the aesthetic zone.
- ◆ Implant site development in the aesthetic zone: 3D reconstruction with autologous bone.
- ◆ Bone harvesting and developing techniques.

SPEAKER

For a biologically oriented and comprehensive care of the patient, Dr. Lapa Bessa focuses on complex aesthetic restorations at the highest level using contemporary technologies and the most up-to-date surgical protocols in modern implantology.

He lectures at numerous universities as a guest professor and at conferences around the world. As a teacher, he and his skilled team are aware of the importance of conveying the most accurate information to the course participants in a playful but educative manner.

FULL-ARCH IMMEDIATE RESTORATION

PORTO, PORTUGAL

CONTENT POINTS

Day 1:

- ◆ Indications and contraindications for full-arch immediate loading.
- ◆ Diagnosis and treatment planning in implant-supported full-arch rehabilitation.
- ◆ The role of virtual patient in full-arch therapy.
- ◆ The SKY fast & fixed concept for maxilla and mandible.
- ◆ Hands-on SKY fast & fixed surgical and prosthetic direct capture.

Day 2:

- ◆ The multi-guide concept: stackable, magnet or fixed multi guides.
- ◆ The SKY fast & fixed FP1 concept.
- ◆ Soft tissue management in FP1 concept.
- ◆ The role of PET in FP1 concept.
- ◆ Hands-On multi-guide concept with surgical and prosthetic part (can be with Zr- or Tit-implants).

Day 3:

- ◆ Live surgery: Guided FP1 with multi-guide concept and soft tissue management.
- ◆ The role of zygomatic implants full-arch surgery.
- ◆ Complications in full-arch surgery.

COURSE DURATION

3 days
full-day

ROMANIA

SKY fast & fixed TREATMENT

IMMEDIATE LOADING FULL-ARCH RESTORATIONS ON REDUCED NUMBER OF IMPLANTS

BUCHAREST, ROMANIA

CONTENT POINTS

Day 1:

- ♦ Achieving high primary stability: Tips & Tricks.
- ♦ Anaesthetics and incision.
- ♦ SKY fast & fixed concept: Discovering important anatomic elements.
- ♦ Various surgical techniques.
- ♦ Hands-On.
- ♦ Completing the permanent restoration.
- ♦ Digitalization and modern protocols.
- ♦ Hands-On.
- ♦ SKY fast & fixed usage: Accidents & Incidents.
- ♦ Role play: SKY fast & fixed positioning and presentation to patients.

Day 2:

- ♦ SKY fast & fixed implant system.
- ♦ Patient profile and special cases.
- ♦ Trans-sinus implants.
- ♦ Video-taped operations and surgical protocols discussion.
- ♦ Completing provisional restorations and the principle of passivity.
- ♦ The 3 golden rules for a successful implant treatment.
- ♦ SKY fast & fixed cases: Clinical chronological evolution.
- ♦ Difference between SKY fast & fixed and other therapies.
- ♦ Immediate loading prosthetics.

Dr. Florian Obădan
florian.obadan@bredentgroup.ro
(+40) 752 733 368

SPEAKER

Dr. Obădan holds a Master's Degree in Implant Supported Prosthetic Rehabilitations as well as one in Implantology from Universidad Catholica San Antonio de Murcia. In his early years in the dental practice, he discovered his passion for implantology which is among others evident with his Phantom head Trainer Certificate from IFZI Nuremberg in Germany with the main focus being on implantology.

Dr. Obădan is constantly seeking for new protocols and manners in order to bring back his patients' smiles on a sustainable long-term basis. With over 20 years spent in the dental industry and implantology, Dr. Obădan is one of the best-known experts in this domain and the first one to perform SKY fast & fixed implant treatments in Romania, approximately 11 years ago. He is passionate about teaching dentist based on real world clinical evidence.

Dr. Florian Obădan
Dentist

With a career of almost 40 years as a dental technician, DT Băcilă has dedicated the past 10 years to cases about immediate restorations for SKY fast & fixed while continuing to train and support other fellow dental technicians with their work.

Moreover, he is also an International System Consultant for the courses, events and live demos organized by bredent group Romania and bredent group Germany. He often delivers lectures in tandem with Dr. Florian Obădan. He has vast knowledge in dental photography, and he is an expert trainer in implant planning softwares such as CoDiagnostiX. He also runs a modern dental laboratory called Dental Implant Prosthetic which receives contracts from all regions in Romania and other countries.

SPEAKER

Prof. Dr. Özyuvacı graduated from the Faculty of dentistry at the University of Istanbul in 1987. Right after his graduation he started his residency program at the department of Oral and Maxillofacial Surgery of the same university. He worked as an assistant professor for 10 years before being awarded with a full professorship. Since 2008, he has been the delegate of Turkey to the European Association of Dental Implantologists (BDIZ-EDI).

Also, he is an instructor at the International Training Centre for Dental Implantology (IFZI) in Nuremberg in Germany and adviser to the Clean Implant Foundation. When he is neither working at the university, in his private clinic -Dental Forum Istanbul Oral Surgery and Implantology Clinic nor imparting hands-on knowledge on dentists during CME courses, he is at the country club playing golf.

Prof. Dr. Hakan Özyuvacı
Dentist

IFZI

International Training Center for dental implantology

CONTENT POINTS

Module 1

- ♦ Integration of implantology into everyday practice.
- ♦ Introduction to implant surgery and prosthetics.
- ♦ Introduction to the SKY implant system and overview of the various alternatives.
- ♦ Demonstration of three-dimensional bone drilling and suturing technique on the phantom.
- ♦ Practical exercise on the phantom to perfect the various suturing techniques in the upper and lower jaw, insertion of reduced-diameter implants in the lower jaw.

Module 2

- ♦ Practical implantation in the lower jaw with various different implantation techniques and implant types using the GBR technique.
- ♦ Practical implantation in the upper jaw, socket pre-servation technique, internal sinus lift, reduced-length implants.

Module 3

- ♦ Introduction to the external sinus lift.
- ♦ Demonstration of sinus surgery on phantom patients.
- ♦ Implantation in the upper jaw with external sinus lift.
- ♦ Piezosurgery.
- ♦ PRF basics.

Module 4

- ♦ Case-specific implant prosthetics, removable and fixed reconstruction options.
- ♦ Dentist/dental technician and surgical assistant cooperation on the phantom.
- ♦ Discussion of options in your own cases.

COURSE DURATION

2 – 3 days
full-day

SPEAKER

Dr. Voges works in the field of implantology since 1995. He is a consultant to dental practices in the following cities: Hamburg, Zurich, London and Helsinki. Additionally, he also is a consultant on the implementation of modern treatment methods. He obtained his Master of Oral Medicine in implantology in 2006 at the IMC in Münster, Germany. 6 years later, in 2012, Dr. Voges attained his Master of Science degree on Implantology and Dental Surgery as well from the IMC in Münster. Prof. Dr. Voges works part-time at the Osnabrück University for Applied Sciences as a professor for the dental technology course.

Besides being a consultant and professor he is a supervisor and speaker at the International Training Center for dental implantology (IFZI) where he oversees national and international trainings. This task of being a speaker is not limited only to IFZI. Dr. Voges is active as a speaker all over Germany as well as abroad.

Prof. Dr. Ingo Voges
IFZI Supervisor

INTERNATIONAL CURRICULUM COMPACT FOR IMPLANTOLOGY & DENTAL SURGERY

NUREMBERG, GERMANY
